

ASISH JANA

SERVICE DESK ENGINEER | IT SUPPORT

Phone: [6289662704](tel:6289662704) | Email: asishjana9230@gmail.com | Location: Kolkata - 700137 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE SUMMARY

Results driven B.Tech graduate (Electronics & Communication Engineering, CGPA 8.67) with hands on technical foundation in IT support, end user troubleshooting, and ITSM workflows. Proficient in ticketing systems (ServiceNow, Jira, Zendesk), Active Directory, networking fundamentals (TCP/IP, DNS, DHCP), and remote support. Demonstrated ability to diagnose hardware/software issues, perform root cause analysis, document incidents, and follow SLA driven escalation processes. Seeking an L1 Service Desk role to contribute to seamless IT operations and deliver exceptional end user support.

EDUCATION

- B.Tech – Electronics & Communication Engineering, MAKAUT University (2020 – 2024) | CGPA: 8.67
- Higher Secondary (Science) (2018 – 2020) | 80%
- Secondary (2017 - 2018) | 70%

INTERNSHIP & TECHNICAL TRAINING

Agriculture Production Optimization System | Euphoria GenX

Feb 2023 - Apr 2023

- Developed a machine learning based system to optimize crop production using agricultural data like soil, rainfall, and temperature. Applied data preprocessing and predictive algorithms in Python to improve crop yield accuracy. Documented findings and resolved data issues to ensure reliable results.

Heart Disease Prediction | Ardent Computech Pvt. Ltd

Jan 2023 - Mar 2023

- Developed a machine learning model to predict the likelihood of heart disease using patient health data such as age, cholesterol, blood pressure, and ECG results. Performed data pre-processing, feature selection, and applied classification algorithms in Python to improve prediction accuracy. Evaluated model performance and documented results to ensure reliable and interpretable outcomes.

ACADEMIC PROJECTS

Emotion Based Music Player (Final Year Project)

Dec 2023 - May 2024

- Developed an emotion based music player that analyzes facial expressions to detect the user's mood in real time. Based on the detected emotion, it intelligently recommends and plays suitable songs to enhance the user's listening experience.

JARVIS-AI (Ongoing) [[GitHub](#)]

- Developed a AI assistant capable of speech to text and text to speech interaction, enabling seamless voice-based communication with the system. It can execute system commands to open applications on the PC and, if unavailable locally, automatically search and open relevant resources in the web browser.

TECHNICAL SKILLS

- TSM & Ticketing: ServiceNow, Jira, Zendesk - incident logging, ticket management, SLA adherence
- Operating Systems: Windows OS (troubleshooting, configuration), Linux Basics
- Networking: TCP/IP, DNS, DHCP, Remote Support, VPN basics
- Directory Services: Active Directory — user provisioning, password resets, group policy
- Email Systems: SMTP, POP3, IMAP; Email Security: SPF, DKIM, DMARC
- Hardware & Software: Hardware troubleshooting, driver issues, software installation & support
- Programming & DB: Python, Java, MySQL/SQL — scripting & data queries for IT operations
- Cloud & DevOps: Cloud infrastructure basics (AWS/Azure exposure), DevOps (Beginner)
- Data Analysis: Python, SQL — anomaly detection, reporting

SOFT SKILLS

- Problem Solving & Root Cause Analysis
- Team Collaboration
- Incident Prioritisation
- Adaptability & Quick Learning
